# Multiplexed tissue imaging symposium - Online

10 January 2023
University of Zurich

Key note speaker

Leeat Keren

Sponsored by:

© Alina Bollhagen, Lena Cords

Program

8:30   **Bernd Bodenmiller**
"Clinical application of multiplexed tissue imaging"

10:00   **Spencer Watson**
"High-Dimensional Spatial Analysis Reveals Protective Niches in Post-Treatment Glioblastoma"

11:00   **Key note lecture:**
Leeat Keren
"Computational methods for multiplexed imaging"

13:00   **Lena Cords**
"Dissecting cancer-associated fibroblasts heterogeneity using imaging mass cytometry"

14:00   **Julio Saez-Rodrigues**
"Knowledge-based machine learning of spatial omics data to understand disease"

15:30   **Christian Schürch**
"Deconstructing Disease Mechanisms, Therapy Responses and Patient Outcomes by Highly Multiplexed Tissue Imaging"
